

Certificate in *Data Analytics in Economics*

About the certificate: The Data Analytics in Economics certificate is designed for **undergraduate students** with a foundation in economics who seek to enhance their resumes with statistical and econometric skills, with a focus on hands-on experience using statistical software including Excel, EViews, R, and SAS.

Coursework (four courses for the certificate):

- Required (two courses):
 1. ECON 1100 (Micro) or ECON 1110 (Macro)
 2. ECON 4630 (Data analysis) or Equivalent
- Choose two courses from:
 - ECON 4030 (Forecasting)
 - ECON 4870 (Econometrics)
 - ECON 4875 (Empirical linear modeling)

For more information: Drop by the Department of Economics main office at Wooten Hall Room 325. Contact an advisor at EconAdvising@unt.edu, or talk to an instructor in ECON class.
