

Certificate in *Data Analytics in Economics*

About the certificate: The *Data Analytics in Economics* certificate program is designed for students with a foundation in economics who seek to enhance their resumes with statistical and econometric skills, with a focus on hands-on experience using statistical software including Excel, EViews, R, and SAS.

Coursework (four courses for the certificate):

- Required (two courses):
 1. ECON 1100 (Micro) or ECON 1110 (Macro)
 2. ECON 4630 (Data analysis) or Equivalent
- Choose two courses from:
 - ECON 4030 (Forecasting)
 - ECON 4870 (Econometrics)
 - ECON 4875 (Empirical linear modeling)
